theory of practice is recognized
as a major theoretical text on
the foundations of
anthropology and sociology
pierre bourdieu a distinguished
french anthropologist develops
a theory of practice which is
simultaneously a critique of the
methods and postures of social
science and a general account
of how human action should be

understood with his central concept of the habitus the principle which negotiates between objective structures and practices bourdieu is able to transcend the dichotomies which have shaped theoretical thinking about the social world the author draws on his fieldwork in kabylia algeria to illustrate his theoretical propositions with detailed study of matrimonial strategies and the role of rite and myth he analyses the dialectical process of the incorporation of structures and the objectification of habitus whereby social formations tend to reproduce themselves a rigorous consistent materialist approach lays the foundations

for a theory of symbolic capital and through analysis of the different modes of domination a theory of symbolic power
