requires a dose of creativity and analytic ability furthermore there is more than one way to get the job done our approach will help you discover these ways and make a considered choice don't just buy it but study it thoroughly and then apply it to your own professional practice prof dr edward groenland professor of business research methodology nyenrode business university this book is about the essence of market research and about how to tackle market research problems wiebe de ridder managing consultant usp marketing consultancy for whom is this book in writing this book our thinking focused largely on those who are asked to set up and carry out a market research project or have it carried out by others the book is written from the perspective of the agency researcher who has to make a research proposal it is however not really relevant whether it is written from the perspective of the client or of the research agency because the line of thinking is the same we assume that a research proposal must be composed for clients who need to draw up a briefing and for those who help them this book will provide concrete leads for ways in which the research problem can be structured and for what information is needed students who in doing an internship assignment or a graduation project must set up their own research study often run into difficulties creating the design their coursework has dealt with operational elements such as making a questionnaire and

selecting the sample but the analysis of the problem was not dealt with in depth after some consideration they come up with a long list of research questions that may be relevant to answer but choosing the most relevant research questions and then choosing the best methodology to answer them is quite a challenge particularly for those students who are dealing with this for the first time the structured approach we provide in this book will help create clarity about what they actually need to research before they start work on their project
