this book developed from an ifip workshop which brought together methods and architecture researchers in human computer interaction and software engineering to an extent this introduction is a little unfair to the authors as we have distilled the results of the workshop to give the reader a perspective of the problems within integrated approaches to usability engineering the

papers could not hope to address all of the issues however we hope that a framework will help the reader gain further insights into current research and future practice the initial motivation was to bring together researchers and practitioners to exchange their experiences on graphical user interface gill design problems the two groups represented methodological and architecture tools interests so the workshop focused on intersection of how methods can support user interface development and vice versa how tools architectures and reusable components can empower the

design process  
there is we believe  
a constructive  
tension between  
these two  
communities  
methodologists  
tend to approach  
the design problem  
with task domain  
organisational  
analysis while the  
tool builders  
suggest design  
empowerment  
envisioning as a  
means of improving  
the way users work  
rather than relying  
on analysis  
of current systems  
this debate revolves  
around the  
questions of  
whether users  
current work is  
optimal or whether  
designers have the  
insight to empower  
users by creating  
effective solutions  
to their problems  
tool builders  
typically want to

build something  
then get the users  
to try it while the  
methodologists  
want to specify  
something validate  
it and then build it  
a how to guide to  
get others in your  
organization to  
accept new  
technologies  
processes  
regulations  
management etc

key facets of living working learning innovating and collaborating in today s hyper complex world this book contains selected papers from the kes idt 2021 conference being held as a virtual conference in june 14 16 2021 the kes idt is an interdisciplinary conference with opportunities for the presentation of new research results and discussion about them under the common title intelligent decision technologies the conference has been creating for years a platform for knowledge transfer and the generation of new ideas in the field of intelligent decision making the range of topics

discussed during the conference covered methods of classification prediction data analysis big data decision support knowledge engineering modeling social networks and many more in areas such as finance economy management and transportation the discussed topics covered also decision making for problems regarding the electric vehicle industry the book contains also several sections devoted to specific topics such as advances in intelligent data processing and its applications multi criteria decision analysis methods knowledge engineering in large scale systems

high dimensional data analysis spatial data analysis and sparse estimation innovative technologies and applications in computer intelligence intelligent diagnosis and monitoring of systems decision making theory for economics this book constitutes the proceedings of the fourth international conference on internet of things iot technologies for healthcare healthyiot 2017 held in angers france in october 2017 the iot as a set of existing and emerging technologies notions and services can provide many solutions to delivery of electronic

healthcare patient care and medical data management the 17 revised full papers presented were carefully reviewed and selected from 23 submissions the papers cover topics such as healthcare support for the elderly real time monitoring systems security safety and communication smart homes and smart caring environments intelligent data processing and predictive algorithms in e health emerging e health iot applications signal processing and analysis the smartphones as a healthy thing machine learning and deep learning and cloud computing this

book constitutes the refereed proceedings of the 6th international conference on hybrid learning 2013 held in toronto on canada in august 2013 the 35 papers presented in this volume were carefully reviewed and selected from numerous submissions the selected articles broadly cover topics on hybrid learning and continuing education including computer supported collaborative learning experiences in hybrid learning pedagogical and psychological issues e learning and mobile learning open education resources and open online courses and

issues in hybrid learning and continuing education this book presents the formal definition of fundamental transformations in category theory as a mathematical language to be used in computer science modelling the book focuses in particular on models with global and internal symmetries in analogy to field theories like quantum mechanics and general relativity the second part of the book is dedicated to more advanced applications of category theory to computer science the five volume set lncs 10111 10115 constitutes the thoroughly refereed post conference

proceedings of the 13th asian conference on computer vision accv 2016 held in taipei taiwan in november 2016 the total of 143 contributions presented in these volumes was carefully reviewed and selected from 479 submissions the papers are organized in topical sections on segmentation and classification segmentation and semantic segmentation dictionary learning retrieval and clustering deep learning people tracking and action recognition people and actions faces computational photography face and gestures image alignment computational

photography and image processing language and video 3d computer vision image attributes language and recognition video understanding and 3d vision to thoroughly understand what makes linux tick and why it s so efficient you need to delve deep into the heart of the operating system into the linux kernel itself the kernel is linux in the case of the linux operating system it s the only bit of software to which the term linux applies the kernel handles all the requests or completed i o operations and determines which programs will share its processing time and in what order responsible for the

sophisticated memory management of the whole system the linux kernel is the force behind the legendary linux efficiency the new edition of understanding the linux kernel takes you on a guided tour through the most significant data structures many algorithms and programming tricks used in the kernel probing beyond the superficial features the authors offer valuable insights to people who want to know how things really work inside their machine relevant segments of code are dissected and discussed line by line the book covers more than just the functioning of the

code it explains the theoretical underpinnings for why linux does things the way it does the new edition of the book has been updated to cover version 2.4 of the kernel which is quite different from version 2.2 the virtual memory system is entirely new support for multiprocessor systems is improved and whole new classes of hardware devices have been added the authors explore each new feature in detail other topics in the book include memory management including file buffering process swapping and direct memory access dma the virtual filesystem and the second

extended filesystem process creation and scheduling signals interrupts and the essential interfaces to device drivers timing synchronization in the kernel interprocess communication ipc program execution understanding the linux kernel second edition will acquaint you with all the inner workings of linux but is more than just an academic exercise you'll learn what conditions bring out linux's best performance and you'll see how it meets the challenge of providing good system response during process scheduling file access and memory management in a wide variety of

environments if knowledge is power then this book will help you make the most of your linux system how secure is your sap businessobjects environment find out with this book which will shore up your understanding of the basic concepts involved in securing data and teach you the practical technical steps you'll need to explore the frameworks properties and data sources of the sap businessobjects suite up to date for release 4.0 fp3 and applicable to earlier releases this comprehensive guide is the key to locking down your system this is the proceedings of the sixth symposium on empirical

foundations of information and software sciences effiss which was held in atlanta georgia on october 19 21 1988 the purpose of the symposia is to explore subjects and methods of scientific inquiry which are of common interest to information and software sciences and to identify directions of research that would benefit from the mutual interaction of these two disciplines the main theme of the sixth symposium was modeling in information and software engineering with emphasis on methods and tools of modeling the symposium covered topics such as

models of individual and organizational users of information systems methods of selecting appropriate types of models for a given type of users and a given type of tasks deriving models from records of system usage modeling system evolution constructing user and task models for adaptive systems and models of system architectures this symposium was sponsored by the school of information and computer science of the georgia institute of technology and by the u s army institute for research in management information communications

and computer sciences airmics 17le editors vii contents 1 i keynote address delve inside windows architecture and internals and see how core components work behind the scenes led by three renowned internals experts this classic guide is fully updated for windows 7 and windows server 2008 r2 and now presents its coverage in two volumes as always you get critical insider perspectives on how windows operates and through hands on experiments you ll experience its internal behavior firsthand knowledge you can apply to improve application design

debugging system

fifth international  
conference on  
database systems  
for advanced  
applications dasfaa  
97 dasfaa 97  
focused on  
advanced database  
technologies and  
their applications  
the 55 papers in  
this volume cover a  
wide range of areas  
in the field of  
database systems  
and applications  
including the  
rapidly emerging  
areas of the  
internet multimedia  
and document  
database systems  
and should be of  
great interest to all  
database system  
researchers and  
developers and  
practitioners the  
ethics of creativity  
illuminates the

thorny issues that  
arise when novel  
creative ideas  
collide with what  
we believe to be  
right or good this  
book tackles  
questions of when  
creativity and  
ethics tend to  
coincide and when  
conflict and how  
both might be  
harnessed to  
support a brighter  
future for all sap bi  
edge is a powerful  
business  
intelligence bi  
solution for midsize  
companies this  
book offers a  
comprehensive  
overview of what to  
expect and where  
you should start  
building your  
reporting  
framework you ll  
get detailed  
information on  
reporting tools like  
information

data model based  
on your  
configuration step  
by step instructions  
on how to create a  
sap bi universe this  
book constitutes  
the refereed  
proceedings of the  
26th symposium of  
the german  
association for  
pattern recognition  
dagm 2004 held in  
tbingen germany in  
august september  
2004 the 22 revised  
papers and 48  
revised poster  
papers presented  
were carefully  
reviewed and  
selected from 146  
submissions the  
papers are  
organized in topical

sections on learning  
bayesian  
approaches vision  
and faces vision and  
motion biologically  
motivated  
approaches  
segmentation  
object recognition  
and object  
recognition and  
synthesis the  
optimum path  
forest opf classifier  
was first published  
in 2008 in its  
supervised and  
unsupervised  
versions with  
applications in  
medicine and image  
classification since  
then it has  
expanded to a  
variety of other  
applications such as  
remote sensing  
electrical and  
petroleum  
engineering and  
biology in recent  
years multi label  
and semi  
supervised versions

were also  
developed to handle  
video classification  
problems the book  
presents the  
principles  
algorithms and  
applications of  
optimum path  
forest giving the  
theory and state of  
the art as well as  
insights into future  
directions presents  
the first book on  
optimum path  
forest shows how it  
can be used with  
deep learning gives  
a wide range of  
applications  
includes the  
methods underlying  
theory and  
applications of  
optimum path  
forest opf the two
