Nutrition and Management of Dogs and Cats 1983 the present work is the third in a series constituting an extension of my doctoral thesis done at stanford in the early 1970s like the earlier works the reciprocal modular brain in economics and politics shaping the rational and moral basis of organization exchange and choice kluwer academic/plenum publishing 1999 and toward consilience the bioneurological basis of behavior thought experience and language kluwer academic/plenum publishing 2000 it may also be considered to respond to the call for consilience by edward o wilson i agree with wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences i consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which i choose to call interpersonal behavioral ecology ecology as a general field has emerged in the last quarter of the 20th century as a major theme of concern as we have become increasingly aware that we must preserve the

Political Questions 1989 intensive animal agriculture wrongs many many animals philosophers have argued on this basis that most people in wealthy western contexts are morally obligated to avoid animal products this book explains why the author thinks that s mistaken he reaches this negative conclusion by contending that the major arguments for veganism fail they don t establish the right sort of connection between producing and eating animal based foods moreover if they didn t have this problem then they would have other ones we wouldn t be obliged to abstain from all animal products but to eat strange things instead e g roadkill insects and things left in dumpsters on his view although we have a collective obligation not to farm animals there is no specific diet that most individuals ought to

have nevertheless he does think that some people are obligated to be vegans but that s because they ve joined a movement or formed a practical identity that requires that sacrifice this book argues that there are good reasons to make such a move albeit not ones strong enough to show that everyone must do likewise
