Influence of Home Environment on the Academic Performance of Secondary School Students in Imo State

2019-12-16 bachelor thesis from the year 2019 in the subject pedagogy general grade 3 8 language english abstract the general purposes of this study is to find out the influence of home environment on study academic performance specifically the study sets out to examine the influence of parental occupation on the academic performance of secondary school students in owerri metropolis of imo state it tries to find out whether the size of the family to which they belong affect the students academic performance in owerri metropolis and to determine the extent to which type of family would affect the academic performance of students this study will be delimited to government owned secondary schools in owerri municipal of imo state nigeria over a period of time it has been observed the students who are exposed to the same lesson by the same teachers are likely to perform differently when they are evaluated according to fagbamiye the board education or ministry of education world wide suspected teaching methodology and classroom teachers as being the cause at the problem yet it seems to persist this shows that outside the school environment students are faced with other factors that influence their academic performances there is also clear distinction between the gifted children and others but even at that there are factors that influence the academic of both gifted and non gifted children which can not be traced to the school

environment

Perception of Students and Teachers on Academic Performance
2014-06-04

The Essence of Academic Performance 2020-05-27 this volume is a collection of research on academic performance chapters cover such topics as targeting underserved urban youth education and science community based projects pedagogy and developing educational programs among others written by experts this book offers a comprehensive view of recent developments in the field of academic performance

Student Achievement 2016-12-01 a style is any pattern we see in a person's way of accomplishing a particular type of task the task of interest in the present context is education learning and remembering in school and transferring what is learned to the world outside of school teachers are expressing some sort of awareness of style when they observe a particular action taken by a particular student and then say something like this doesn't surprise me that's just the way he is observation of a single action cannot reveal a style one's impression of a person's style is abstracted from multiple experiences of the person under similar circumstances in education if we understand the styles of individual students we can often anticipate their perceptions and subsequent behaviors anticipate their misunderstandings take advantage of their strengths and avoid or correct their weaknesses these are some of the goals of the present text in the first chapter i present an overview of the terminology and research methods used by various authors of the text although they differ a bit with regard to meanings ascribed to certain terms or with regard to conclusions drawn from certain types of data there is nonetheless considerable agreement especially when one realizes that they represent three different continents and five different nationalities

Testing, Teaching, and Learning 1999-10-06 academic paper from the year 2020 in the subject business economics business

management corporate governance course business management language english abstract this study assesses the influence of the integrity of school leaders on the academic performance of students in secondary schools a explanatory cross sectional survey design with a concurrent mixed approach using quantitative and qualitative data was employed a total of 202 teachers provided evidence on their head of school s integrity in influencing students academic performance the study used questionnaires in depth interview and focus group discussion to collect the data afterwards the collected data was analysed using spss version 23 for quantitative data and thematic analysis for qualitative data a significant relationship between the integrity and students academic performance was revealed the study concluded that the integrity attribute significantly influenced the students academic performance therefore the study recommends the government to allocate enough funds for professional development for future aspirants secondly it recommends to review educational policy on the training and development of teachers before and after their appointment into a leadership position

Theorizing Shadow Education and Academic Success in East Asia
2021-07-12

The Impact of Continuous Assessment on the Academic Performances of Students 2019-06-18 seminar paper from the year 2016 in the subject pedagogy school system educational and school politics ahmadu bello university department of educational psychology and counselling language english abstract this work explores the impact of continuous assessment on the academic performances of students with the help of a survey that questioned 120 secondary school teachers in ilorin metropolis over the years the practice of continuous assessment has been the pre evaluation process of the academic success of students before their final examination period nowadays however it appears that teachers are not using continuous assessment to

prepare students for examinations in view of this the study investigates the impact of continuous assessment regarding the academic performance of students the descriptive survey design was employed for the study and a random sampling technique was used to select 120 teachers in ten different secondary schools in ilorin metropolis the instrument used was a self designed questionnaire entitled impact of ca academic performance questionnaire icaapq the study reveals that continuous assessment helps students to remember what has been learnt to concentrate on difficult areas of a subject and help to identify their areas of strengths and weaknesses the author recommends that teachers should work with school counsellors to critically examine students performances in continuous assessment in order to understand their areas of weaknesses

Factors Affecting Academic Performance 2017 nowadays society is constantly changing and new ways of life are being developed by due to nonstop technological advancements this generates changes in family schools the media etc new technologies are creating virtual environments to manage learning and academic achievement and this is a new challenge to approach formal and informal education in the last few decades teachers families and educational administrators had very well defined fields of action and roles to play now these roles are disfigured and influences from all agents are arguable and more difficult to face at this current stage problems sometimes appear that require different forms of intervention some of the problems are violence towards people child abuse drug abuse at increasingly early ages integration problems due to immigration dropping out of school and typical problems related to student development personality disabilities social and psychical maladjustment teenagers socioaffective relationships etc research on school success and failure has a long history but there is still no agreement concerning the prevalence of these variables to explain academic achievement the relationship between those

variables and which other variables modulate their level of impact for many years cognitive psychology has emphasized cognitive function as the most relevant for learning in school however recent studies highlight the importance of motivational and affective functions in building consistent models to explain learning and academic achievement this change of perspective from the classical cognitive model to a self regulated learning model has implied a new orientation in the research of the factors involved in school success and failure self regulated learning models try to integrate students cognitive socioaffective and behavioral aspects these models describe the different components involved in successful learning at all school stages explaining reciprocal relationships between those components and directly relating learning to personal achievement motivation volition and emotions with this new paradigm students not only contribute to strengthening their intelligence but also their motivational and emotional qualities all related to achieving personal balance this book presents studies ideas and recommendations to shed light on the complex educational world education has limits and difficulties but it is also the only instrument that can develop students potential into personal success

Stress and Academic Performance of Students in Kwabre East District 2015-06-22 the study adopted a case study method which seeks to assess the impact of stress on academic performance of senior high school students in the kwabre east district of the ashanti region of ghana the study conveniently and purposely selected 277 students from simms senior high school kofi agyei senior high school and gyamaa pensah senior high school the students were stratified into form 1 form 2 and form 3 students to ensure representation of all students at all levels it was realized from the study that stress level among students in senior high schools in the kwabre east district of the ashanti region was high and major causes of stress were academic achievement financial

problem and romantic relationship it was realized that sex academic levels of students and whom student lived with significantly influenced stress among senior high school students in kwabre east district of the ashanti region however programme pursued by students in senior high schools in the kwabre east district of the ashanti region did not significantly influence stress among student a stressful senior high school student in the kwabre east district of the ashanti region sought advice from teacher

Impact of Social Interaction among Learners on Academic Performance in Literacy Centres. A Case Study of Kumbotso Local Government Area, Kano State 2020-01-14 academic paper from the year 2019 in the subject pedagogy adult education language english abstract this study specifically focuses on the impact of social interaction among learners on academic performance in literacy centres in kumbotso local government area kano state two 2 literacy centres were purposively selected and used for this research work three 3 research questions were raised and answered in this study the research design used in this study was survey research design simple random sampling technique was used to select 100 learners from the 2 selected literacy centres data was collected using 11 items questionnaire and analyzed using frequency percentages and tables the study revealed that social interaction or relationship influence learners participation in their academic performance psychological characteristics serve as determinants of participation in learners academic performance and also economic reasons influence learners participation in their academic performance the researcher recommended that teacher should build on what is heard from the students and share his her personal experience with the students in order for the students to feel free in expressing their own worries stories and interest literacy centres should demonstrate positive attitudes and learner s social interaction these can effectively enhance teaching and learning towards the

accomplishment of good students academic performance in the literacy centres

The Family Effect on Academic Performance in School. A Case Study of selected Schools in Kabale District 2017-12-21 academic paper from the year 2017 in the subject education educational tests measurements atlantic international university education foundations course education management language english abstract the study was carried out in selected schools of kabale district to determine the effect of family background on the academic performance of students in secondary schools both random and purposive sampling techniques were used to select respondents primary data was collected using observation interview and questionnaires whereas secondary data was collected from the statistical records from the education department

Academic Success 2021 this book focuses on the effect of psychological social and demographic variables on student achievement and summarizes the current research findings in the field it addresses the need for inclusive and interpretive studies in the field in order to interpret student achievement literature and suggests new pathways for further studies appropriately a meta

analysis approach is used by the contributors to show the big picture to the researchers by analyzing and combining the findings from different independent studies in particular the authors compile various studies examining the relationship between student achievement and 21 psychological social and demographic variables separately the philosophy behind this book is to direct future research and practices rather than addressing the limits of current studies

Homework, Learning and Academic Success: The Role of Family and Contextual Variables 2020-02-24 the main purpose of this research topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework this will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework however the time spent on homework is not in itself evidence of the student s involvement nor is time spent indicative of quality time indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence it is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation in tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments the decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student s motivation and the student s level of engagement with homework furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher

prescribes those tasks and the connection established with classroom learning teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework lastly the effectiveness of teacher feedback depends on its contribution to the student s educational progress and how that student will perform in the future in addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents role although there are discrepancies regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties in this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework the objective of this research topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning this work was developed with the financing of the research projects edu2013 44062 p mineco edu2017 82984 p meic

The Impact of Effective Teaching Strategies on the Students' Academic Performance and Learning Outcome

2015-05-19 literature review from the year 2014 in the subject pedagogy common didactics educational objectives methods grade a language english abstract this discussion focuses on

Factors contributing to academic performance of students in a Junior High School 2018-11-22 bachelor thesis from the year 2018 in the subject pedagogy school system educational and school politics grade 5 gha system university of education

distance learning course post graduate diploma in education language english abstract students academic performance is a key feature in education this study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of junior high students jhs in a basic school which is in the gomo east district in the central region of ghana the mixed and descriptive research design was used and a sample size of 87 respondents 79 students and 8 teachers were selected through random sampling technique the findings revealed that the average academic performance 47.0 of the jhs students in the basic school is weak and their performance in mathematics average score of 31.48 and english language average score of 39.99 is a fail it was noticed that student factors

that contribute to an improvement in academic performance include regular studying self motivation punctuality and regular class attendance hard work and interest in a subject the teacher factors were completion of syllabus use of tlm s frequent feedback to students and given students special attention per the findings parent factors which was very key was parent showing concern in their children s academics and providing them their academic needs school factors that were significant included availability of text books and tlm s the study also found that parent level of education and gender has a positive relationship with academic performance but it s insignificant however age has a positive significant 5 significance level relationship with academic performance based on findings the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance again the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days

Influence of Leadership Attributes of Head of Schools on Student

Academic Performances 2020-08-25 the purpose of the study was to assess the perception of students teachers on academic performance in selected molo secondary schools in kenya specific objectives of the study were to determine the relationship between poverty performance of students in national examinations the relationship between school facilities performance of students in national examinations the relationship between the quality of teachers performance of students in national examinations the relationship between indiscipline performance of students in national examinations the relationship between home environment performance of students in national examinations methods of data collection were questionnaires interviews the study revealed that school facilities are important for students to perform well in examinations that unqualified

teachers do not teach well leading to poor performance in national examinations the study revealed that children who are indisciplined perform poorly in national examinations and that parents who encourage their children contribute positively to children s performance

Exploring Online Learning Through Synchronous and Asynchronous Instructional Methods 2019-11-22

The Effects of Selected Factors on Academic Performance of On-line and Face-to-face Students 1997

Factors Affecting Academic Performance of Students in a Private College 2000

Analysis of Unsatisfactory Academic Performance of the Students 2012-02 in this research project we tried to determine the factors which have negative impact on academic performance of the students of the university of dhaka in order to improve the academic performance of all students by recommending appropriate interventions to the university authority many factors mentioned are supposed to have negative impact on the academic performance of the students the findings of the study will help the university authority to take proper steps to improve students performance it is expected that the implementation of recommendation given from study will decrease the number of drop out students from the university and the number of students taking readmission in the same year and helps the students to increase their gpa

The Factors Effecting Student Achievement 2017-05-14

Effect of using learning Management System on academic Performance of Students in financial Accounting in Secondary School in Bauchi State 2021-02-03 academic paper from the year 2021 in the subject pedagogy school pedagogics course accounting technology language english abstract this study aimed at finding out the effect of using learning management system on academic performance of students on financial accounting in secondary schools in bauchi state four specific objectives four

research questions and four related null hypotheses were formulated the research design adopted was a quasi experimental design with a population of 10 790 secondary schools students ii that are offering fa in bauchi state purposive sampling technique was used in the selection of the students where the sample size was 240 students and also purposive sampling technique was used in selecting the experimental and control groups mean and standard deviation were used to answer the four research questions independent sample t test was used to test null hypothesis one and four while paired sample t test was used in testing the null hypotheses two and three all null hypotheses were tested at 0 05 level of significance the findings of the study revealed among others that there was a significant difference in the achievement of the students of sss ii taught fa using lms tool compared to those taught using conventional method it was concluded that lms is effective in teaching fa for better students academic performance in secondary school based on this finding it was recommended among others that teachers should intensify efforts in the use of lms tool in teaching fa in secondary schools in bauchi state

Sustaining Quality Teaching and Learning to Instil Good Discipline and Academic Performance 2018-12-19 this book presents an engaging as well as inspiring array of issues and insights drawn from the perspective of dialogic imagination aimed at quality teaching and learning experiences the authors passionately uphold their belief that the prevalence of good discipline and good academic performance are mutually interrelated and if these two prevail in the ecosphere of any classroom these can significantly enrich and enhance the quality of learning in any school settings based on this south africa has made huge strides towards improving the quality of education and people s lives however discipline and academic performance still lag behind due to the lack of quality teaching which also prevents the department of education from accomplishing its

objectives ironically this takes place at a time when the government has resolved to prioritise education among other important developmental issues to this effect this book explores how quality teaching and learning can ensure that discipline and academic performance prevail it shows that quality teaching and learning have the potential to determine discipline and academic performance particularly now that other disciplinary measures have been seen to be ineffective it is framed theoretically by the school improvement theory supported by radical constructivism and critical realism and uses case studies to highlight its findings the book shows that quality teaching and learning can free human potential and ensure that it is developed in line with democratic ideals and identifies the environment as playing an important role in ascertaining whether or not quality teaching and learning can determine discipline and academic performance in schools

Health and Academic Achievement 2018-09-19 emotional physical and social well being describe human health from birth good health goes hand in hand with the ability to handle stress for the future however biological factors such as diet life experiences such as drug abuse bullying burnout and social factors such as family and community support at the school stage tend to mold health problems affecting academic achievements this book is a compilation of current scientific information about the challenges that students families and teachers face regarding health and academic achievements contributions also relate to how physical activity psychosocial support and other interventions can be made to understand resilience and vulnerability to school desertion this book will be of interest to readers from broad professional fields non specialist readers and those involved in education policy

The Use of Social Media and the Academic Performance of Students 2019-03-12 master s thesis from the year 2019 in the subject communications multimedia internet new technologies grade 72 0 coventry university school of engineering environment and computing course msc management of information

technology language english abstract the thesis aims at exploring the use of social media to improve students academic performance in nigeria the study is guided by the interpretivist theoretical perspective which follows a qualitative approach the findings reveal that taraba state university students have access to social media but there is no official social media platform to build learning communities for the improvement of students academic performances in the university in recent times institutions of higher learning around the world are exploring various technologies that encourage active learning one of such technologies is the use of social media in building learning communities learning communities have assisted students learning process by means of collaboration sharing of ideas and information in their respective subject areas this is in accordance with the benefits of mobile technologies and ubiquitous computing internet of a thing and emerging technologies such as web 2 0 and social networking that has captivated the attention of students globally it is this development that has triggered this research on use of social media to improve students academic performance in nigeria the study is guided by the interpretivist theoretical perspective which follows a qualitative approach the case study method and triangulation sampling are employed for indept data collection interviews online survey and observation are used as sources of primary data collection constant comparative analysis method is used to analyse the data social media has become an integral part of people s life as this technology enables people to network with friends and associates share photographs generate contents interact in games and real time conversations the ever increasing proliferation of mobile technologies has increased the use of social media more especially in universities where the technology is transforming the way students communicate collaborate interact and learn

Research Pertaining to the Academic Performance of DAT Students 1997 doctoral thesis dissertation from the year 2020 in

the subject leadership and human resource management management styles language english abstract this study aimed to assess the influence and contribution of leadership attributes of the head of tanzania secondary schools on the students academic performance with particular focus on schools in mbulu district in the manyara region the study identified four specific objectives namely to assess the influence and contribution of integrity inspiration competencies on students academic performance and to specify criteria for appointment of head of schools the study employed an explanatory and cross sectional design in collecting quantitative data using questionnaires administered on selected school teachers and secondary data was collected from a review of pertinent documents and from the internet the findings indicate that there is a significant relationship between the leadership attributes of heads of school and students academic performance hence the study concluded that the integrity competency and inspirational outlooks of heads of schools influence students academic performances

Learning Strategies and Learning Styles 2013-11-11
