The Remaking of the Mining Industry 2015-06-09 turkey s candidacy for membership of the european union has had mixed effects on its public policies the initial degree of cohesion between eu and turkish national policies practices and institutions has varied by the policy field in question leading to a complex amalgam of fit and misfit between the two actors their interaction in different policy areas has had direct influence both on turkey s accession to the eu and its own national reform process with accession negotiations stalled and turkey s relationship with the eu increasingly tenuous it is vital to take stock of the extent to which turkey and the eu are aligned in key policy areas the europeanization of turkish

public policies a scorecard is the first comprehensive work focusing on the impact of the eu accession process upon turkey s public policies between 1999 and 2014 complementing the authors earlier volume europeanization of turkey polity and politics it brings together leading specialists to provide key analyses of the impact of europeanization on specific areas of turkey s public policy each chapter applies a core analytical framework to examine a separate policy field resulting in a consistent and comprehensive volume on turkey eu relations with its focused structure and extensive coverage concluding with a scorecard enabling informed assessment of the impact of europeanization on

turkey s public policy areas this book provides a one stop resource for scholars and students alike a timely and informed assessment of the dynamics and outcome of the europeanization of an eu candidate country s major public policy areas this book represents an essential resource for those interested in eu turkey relations the effects of europeanization on turkey and turkish politics

International GAAP 2015

2015-09-16 since its inception
some 40 years ago petroleum
specific taxation in the uk has
been subject to numerous
modifications often these
modifications were brought
into place not only to
sufficiently incentivise the
investors but also to capture a
fair share for the government
however it is evident from the
frequency of changes that
finding the right balance
between these two aims is no
easy matter such a balance and
the consequent fiscal stability
is necessary for the long term
relationship between the
parties to endure to their
mutual benefit still it does not
take much for one or other
party to feel that they are out
of balance as a consequence
one party feels that the other
party is taking an undue
proportion of the value
generated and that they are
losing out yet achieving that

balance and fiscal stability is possible to understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime this approach is further complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework this latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to further reactive amendments and revisions to the fiscal regime in the future

Redesigning Petroleum

Taxation 2016-01-18 the industrialisation of china prompted the biggest commodity boom of modern times soaring prices gave rise to talk of a commodity super cycle and induced a wave of resource nationalism the author who was chief economist at two of the world s largest mining companies describes how this resulted in a transformation of the global mining industry

The Europeanization of Turkish Public Policies

2020-10 loss of muscle mass and increased fibrosis characterize both sarcopenia of aging and muscular dystrophy research is increasingly showing that these two conditions also share several pathophysiological mechanisms including mitochondrial dysfunction increased apoptosis abnormal modulation of autophagy decline in satellite cells increased generation of reactive oxygen species and abnormal regulation of signaling and stress response pathways this research topic will cover

several mechanisms involved in aging and dystrophic sarcopenia and explore the therapeutic potential of various strategies for intervention

Global Economic

Cooperation 2016 this book looks both backward and forward with regard to the european union s political strategies towards its neighbouring countries by bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the european neighbourhood policy and how it impacts the ongoing construction of the eu s external frontiers is the eu committed to promoting integration in a wider european space or is a fortress europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders the book aims to problematize this question by showing how the eu s external policies are based on a mixture of openness and closure inclusion and exclusion

cooperation and securitisation the european neighbourhood policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border a specific focus is devoted to the diversity of geo strategies the eu is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players

this book
discusses issues such as global
financial crisis and global
governance food security
energy sustainability the global
financial system trade and
protectionism and growth and
employment since the outbreak
of the financial as well as
national debt crises in the euro
zone the focus of the g20 has
shifted back to addressing
short term issues these issues

range from the dynamic effects of global imbalances and the appropriate degree of financial sector regulation to questions of austerity versus growth and the lack of a comprehensive framework for managing the international monetary system a further issue is the relevance of the g20 agenda for emerging market economies global economic recovery still remains fragile and downside risks to global growth remain additionally much of the agenda of the seoul development consensus for shared growth launched in 2010 has yet to be fulfilled a key discussion point in the book therefore is how to make a tangible and significant difference in peoples lives by implementing an agenda of inclusive growth

Pathophysiological Mechanisms of Sarcopenia in Aging and in Muscular Dystrophy: A Translational Approach the iron element fe is strictly required for the survival of most forms of life including bacteria plants and humans fine tuned regulatory mechanisms for fe absorption mobilization and recycling operate to maintain fe homeostasis the disruption of which leads to fe overload or fe depletion whereas the deleterious effect of fe deficiency relies on reduced oxygen transport and diminished activity of fe dependent enzymes the cytotoxicity induced by fe overload is due to the ability of this metal to act as a pro oxidant and catalyze the formation of highly reactive hydroxyl radicals via the fenton chemistry this results in unfettered oxidative stress generation that by inducing protein lipid and dna oxidation leads to fe mediated programmed cell death and organ dysfunction major and

systemic fe overloads occurring in hemochromatosis and fe loading anemias have been extensively studied however localized tissue fe overload was recently associated to a variety of pathologies such as infection inflammation cancer cardiovascular and neurodegenerative disorders in keeping with the existence of cross regulatory interactions between fe homeostasis and the pathophysiology of these diseases further investigations on the mechanisms that provide cellular and systemic adaptation to tissue fe overload are instrumental for future therapeutic approaches thus we encourage our colleagues to submit original research papers reviews perspectives methods and technology reports to contribute their findings to a current state of the art on a comprehensive overview of the importance of iron metabolism in pathophysiologic conditions

Psychologists Magazine August 2021 issue 2015-03-31 this is a history of 1968 written from a new perspective that of center right student activists in west germany based on oral history interviews and new archival sources it examines the ideas experiences and repertoires of center right students in this age of protest writing these activists back into the history of 1968 and its afterlives including student protest

cultural revolt internationalism debates about left wing violence and the terror of the red army faction the memory wars of the 1980s and beyond reveals that this was a broader more versatile and ultimately more consequential phenomenon than the traditionally narrower focus on a left wing minority allows other 68ers demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years student activists comprised individuals from across the political spectrum who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of west german democracy 1968 was a moment of intense political conflict but it also played out within the student body and nurtured contrasting identities this book shows that the center right involvement in 1968 had real consequences many of the protagonists of this book would go on to pursue high profile political careers and leave their

mark on west german political culture other 68ers therefore sheds fresh light on how west germany's center right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968 how it coped with generational change how it transformed and modernized after losing power at the national level for the first time in 1969 and how it managed to re emerge so successfully in the 1980s

Singapore 2018-10-15 climate change is a pressing

international political issue for which a practical but principled solution is urgently required climate justice in a non ideal world aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy the motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances in the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment however there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter the aim of this edited volume is to

address this in doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy the first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change the second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal the chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics

The Other '68ers 2016-09-08 what does sustainable business and net zero carbon emission mean for businesses globally how should companies globally transform into sustainable businesses with net zero carbon emissions this book unpacks the institutional

organisational and management challenges in pursuing sustainable business and carbon neutrality for businesses in this book henry k h wang an internationally recognised climate and business expert provides real life cases across different countries and business sectors he outlines potential policy implications and strategy options for companies to consider in their transitions to sustainable business practices he also explores important new global developments in smart cities green transport and carbon solutions and how the adoption of sustainable finance and green investments can accelerate businesses transformation this book will appeal to anyone interested to learn more about the successful planning and execution of sustainable business and net zero carbon neutrality transformations

Expertisation and Democracy in Europe

2013-01-01 expertisation and democracy in europe provides a much needed account of the role and re organisation of expertise and expert knowledge in europe and the european union in a broad range of policy spheres contributing to the debate triggered by the recent crises it brings novel perspectives to debates on technocracy and our understanding of the relations between knowledge experts and democracy the book explores and assesses new and old linkages between knowledge expertise and democracy and expands and

deepens the current debates by addressing questions such as what is the role of expertise in europe how is knowledge of different kinds embedded in and decisive for democratic practice in contemporary democracies how are we to assess recent transformations of the expert citizens and government civil society relationships from the perspective of democracy and which paths are viable in the years to come finally the book engages with and gives flesh to the notion of expertisation not only as a broad political and societal diagnosis but also as a multidimensional and deeply contested process that unfolds in concrete practices and institutional settings this text will be of key interest to scholars and students of european studies european and european union politics democracy public policy international relations sociology gender studies and media studies
